## SUBJECT INDEX FOR VOLUME 13

- Ablation**  
 excimer  
   sensitivity and nerve regeneration after, 225  
   topographic analysis after, 97  
 Nd:YLF picosecond laser, 471  
   mechanism of, 479
- Acanthamoeba keratitis**  
 confocal microscopy of, 183  
 hexamidine for, 459  
 resolution after epithelial debridement, 186
- Actin**, 51
- Acyclovir**, for herpes simplex keratitis, 232
- Adenocarcinoma**, papillary, of iris, 102
- Adenovirus type-5**, ganciclovir for, 435
- Adhesive**  
 cyanoacrylate, 94  
 laser-activated, 406
- Aldehyde dehydrogenase deficiency**, 67
- Alkali burns**, suppressing corneal allograft rejection following, 447
- Alkaline burn**, limbal conjunctival autograft in, 465
- Allergic conjunctivitis**, 345
- Allografts**  
 limbal transplantation, for corneal surface reconstruction, 389  
 mixed lymphocyte culture response to, 324  
 rejection of  
   corticosteroids in, 383  
   inhibition of, 100  
   in penetrating keratoplasty, 317  
   systemic cyclosporine-A suppression of, 447
- Amyloidosis**, familial subepithelial corneal, 190
- Anesthetic agents**, topical, in Schirmer's tear test, 141
- Angiomatous lesions**, snake oil-induced, 284
- Anterior chamber**  
 depth, in Fuchs' corneal dystrophy and cornea guttata, 131  
 lens, open-loop, 418
- Antibiotic therapy**, for *Pseudomonas aeruginosa* keratitis, 500
- Antimicrobial agents**, in decontamination of donor eyes, 100
- Antimicrobial peptides**, in vitro activity of, 237
- Antiviral drugs**, 435
- Asphericity**, 96
- Astigmatism**  
 postkeratoplasty, corneal analysis system and topographic modeling for, 102  
 surgically induced myopic, 96
- Autofluorescence**, corneal, 373
- Autograft**, limbal conjunctival, 465
- Barrier function**, corneal, 493
- Biological supports**, 125
- Blinking**, tear film lipid layer thickness and, 354
- Blood**, dilution error in laboratory tested, 290
- 5-Bromo-2-deoxyuridine**, 487
- Brush cytology**  
 for allergic conjunctivitis and vernal keratoconjunctivitis, 345  
 for dry eye syndrome, 202
- Burns**  
 alkali, allograft rejection following, 447  
 alkaline corneal, limbal conjunctival autograft with, 465
- Cadaveric donor corneas**, portable keratometry of, 102
- Capsulorhexis**, 98
- Case control investigation**, graft failure, 310
- Case report**  
 of *Acanthamoeba* keratitis, 183  
 of bilateral iridocorneal endothelial syndrome, 368
- Cataracts**  
 in children, pseudophakia for, 93  
 clear corneal incisions in surgery for, 93
- Cecropins**, 237
- Cefazolin**, 274
- Ceftazidime**, 360
- Cell carrier device**, 173
- Cell cultures**, adenovirus type-5 infection in, 435
- Central cloudy dystrophy**, 97
- Centration studies**, 97
- Cetrimide**, toxic keratopathy due to, 95
- Chemotaxis**  
 PMN, 89  
 in vitamin A-deficient cornea, 156
- Children**  
 pseudophakia for traumatic cataracts in, 93  
 structural and ultrastructural corneal development in, 331

- Chlorhexidine, 95  
Cialit, 95  
Ciprofloxacin  
  in *Pseudomonas aeruginosa* keratitis treatment, 500  
  tear concentrations of, 496  
Clinicopathologic case report, corneal decompensation in Kearns-Sayre syndrome, 269  
*Coccidioides immitis*, 539  
Coccidioidomycosis, with necrotizing granulomatous conjunctivitis, 539  
Collagenase, corneal secretion of, 51  
Compromised cornea, silicone rubber contact lenses for, 422  
Computer-assisted topographic corneal analysis, 95  
Confocal microscopy, *Acanthamoeba* keratitis, 183  
Congenital opacity, 521  
Conjunctiva  
  cyanoacrylate adhesive with resection of, 94  
  impression cytology of, 250  
  transplantation of for pterygia in hispanic population, 93  
Conjunctivitis  
  allergic, histamine and tryptase in, 345  
  bilateral giant papillary, with glaucoma drainage surgery blebs, 469  
  necrotizing granulomatous, coccidioidomycosis with, 539  
  papillary, 33  
Contact lens  
  tear plasmin activity with, 210  
Contact lenses  
  *Acanthamoeba* keratitis with, 459  
  rigid extended wear, lactate dehydrogenase activity and isozyme activity with, 429  
  silicone rubber, 422

  dilution error in donor population testing, 290  
  rejection of  
    high-risk, cyclosporin A-suppressed, 447  
    kinetics of in rat penetrating keratoplasty  
      model, 317  
  whole globe enucleation vs. in situ corneal  
    excision in, 305
- Transplantation  
  allograft limbal, for corneal surface  
    reconstruction, 389  
  conjunctival, of pterygia in hispanic population,  
    93  
  of corneal endothelial cells using cell carrier  
    device, 173  
  donor herpes simplex infection in, 294  
  in infants with congenital glaucoma, 521  
  papillary adenocarcinoma of iris transmitted by,  
    102  
  tarsorrhaphy/punctal occlusion in, 97
- Trauma  
  donor tissue, 305  
  iris loss with, corneal tattooing to reduce glare  
    in, 98, 401  
  nocardial necrotizing scleritis after, 274  
  pseudophakia for cataracts of, 93
- Traumatic wound dehiscence, 101
- Triple procedure, 98
- Tryptase, 345
- Ulcer  
  corneal fibroblast MMP-1 secretion and, 51  
  keratitis, peripheral, malignancies and, 364  
  Morren's, cyanoacrylate adhesive in  
    management of, 94  
  in vitamin A deficient-cornea, 156
- Ultrastructure  
  corneal endothelial, 253  
  in posterior polymorphous corneal dystrophy,  
    509  
  in premature infants' and children's corneas,  
    331
- Ultraviolet radiation  
  differential corneal sensitivity to in mice strains,  
    67  
  pterygium formation and, 219
- Urokinase, 51
- Vascularization, corneal  
  following alkali burns, 447  
  YAG laser feeder vessel coagulation of, 264
- Vernal keratoconjunctivitis, 345
- Videokeratography, 94
- Vitamin A deficiency, 156
- Vitreoretinal surgery, 100
- West Indian punctate keratopathy, 377
- Whole globe enucleation, 305
- X-ray analysis, tear fern, 58
- X-ray diffraction  
  of corneal stroma remodelling, 20  
  of tear ferns, 58
- Xeroderma pigmentosum, 527
- YAG lasers  
  corneal graft rejection and, 91  
  feeder vessel coagulation, hemorrhage  
    complicating, 264
